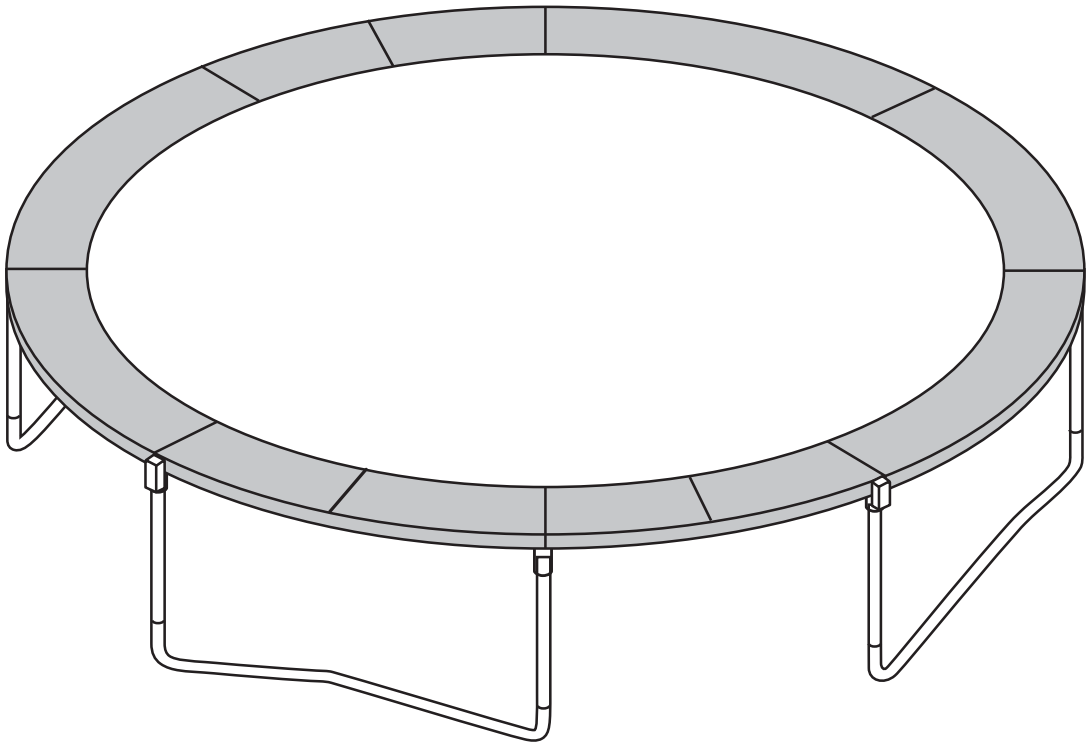
User's Manual

17' Oval Trampoline



Model STSC1700 SAM series

⚠ WARNING

Read all precautions and instructions in this manual before using this equipment. Save this manual for future reference. Maximum user weight 200 lbs.

⚠ IMPORTANT

Trampoline / Enclosure's are susceptible to winds. Be sure to-secure your Trampoline / Enclosure. Wind Damage is not covered in the warranty of your trampoline.

SKYWALKER TRAMPOLINES™

Model STSC1700 SAM series

A serial decal is found on one of the trampoline legs. Model number decal tag is located on the jumping mat

REPLACEMENT PARTS

www.skywalkertrampolines.com

⚠WARNING

Read the assembly, installation, care, maintenance, and use instructions in this manual prior to assembling and using this trampoline. Save this manual for future reference.

USE INSTRUCTIONS

⚠WARNING: To reduce the risk of serious injury, read and follow all of the warnings, precautions, and instructions in this manual before you use the trampoline.
Warnings and instructions for care, maintenance, and use of this trampoline are included to promote safe, enjoyable use of this equipment.

1. It is the responsibility of the owner and supervisors of the trampoline and enclosure to make sure all users obey the safety instructions given in this manual. Secure the trampoline and trampoline enclosure against unauthorized and unsupervised use.

2. The trampoline enclosure is to be only be used as an enclosure that for a trampoline of a size that for which the enclosure is designed.

3. Be sure the trampoline and enclosure are on a level surface before you use it.

4. Adequate overhead clearance is essential. . A minimum of 24 feet (7.3 meters) from ground level is recommended . Provide clearance for wires, tree limbs, and any other possible hazards.

5. Lateral (sidewise) clearance is essential.. Place the trampoline and enclosure away from walls, structures, , fences, sidewalks, and other play areas. maintain a clear space on all sides of the trampoline and enclosure.

6. Use the trampoline and enclosure in an area with lots of light. If the trampoline and enclosure are indoors or in shady areas you may need to use artificial (electrical) lighting in the area.

7. DO NOT attempt or allow summersaults (flips) on trampoline. landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the jumping bed.

8. Always inspect the trampoline enclosure before each use.. Make sure that the frame padding is correctly and securely positioned. Replace any worn, defective, or missing parts. (Jumpers may be hurt if the trampoline and enclosure are used when they are in poor condition.)

9. Remove any obstructions from under the trampoline and trampoline enclosure.

10. Keep objects away which could interfere with the performer. Maintain a clear area around the trampoline.

11. Bounce only when the surface of the mat (bed) is dry. There should be very little or no wind or air movement. The trampoline and enclosure must not be used in gusty or severe winds.

12. Trampoline over 20 in. (51 cm)tall are not recommended for use for for use by children under 6 years of age.

13. Do not let more than one person inside the trampoline enclosure at the same time. Use by more than one person at the same time can result in serious injury.

14. Properly secure the trampoline when not in use. Protect it against unauthorized use. If a trampoline ladder is used, the supervisor should remove it from the trampoline when leaving the area to prevent unsupervised access by children under 6 years of age.

15. Do not jump on the trampoline while you have or are holding any objects, especially something sharp or breakable.

16. Do not use the trampoline while under the influence of alcohol or drugs.

17. Use trampoline enclosure only with mature, knowledgeable supervision.

18. Misuse and abuse of the trampoline enclosure is dangerous and can cause you to be badly hurt.

19. Always climb onto and off of the trampoline. It is a dangerous Practice to jump from the trampoline to the floor or ground when dismounting, or to jump onto the trampoline when mounting. Do not use the trampoline as a springboard to other objects.

20. For information concerning skill training, contact a certified trampoline instructor.

21. For additional information concerning the trampoline equipment contact the manufacturer.
.

22. Avoid bouncing too high. Stay low until bounce control and repeated landings in the center of the trampoline can be accomplished Control in more important than height.

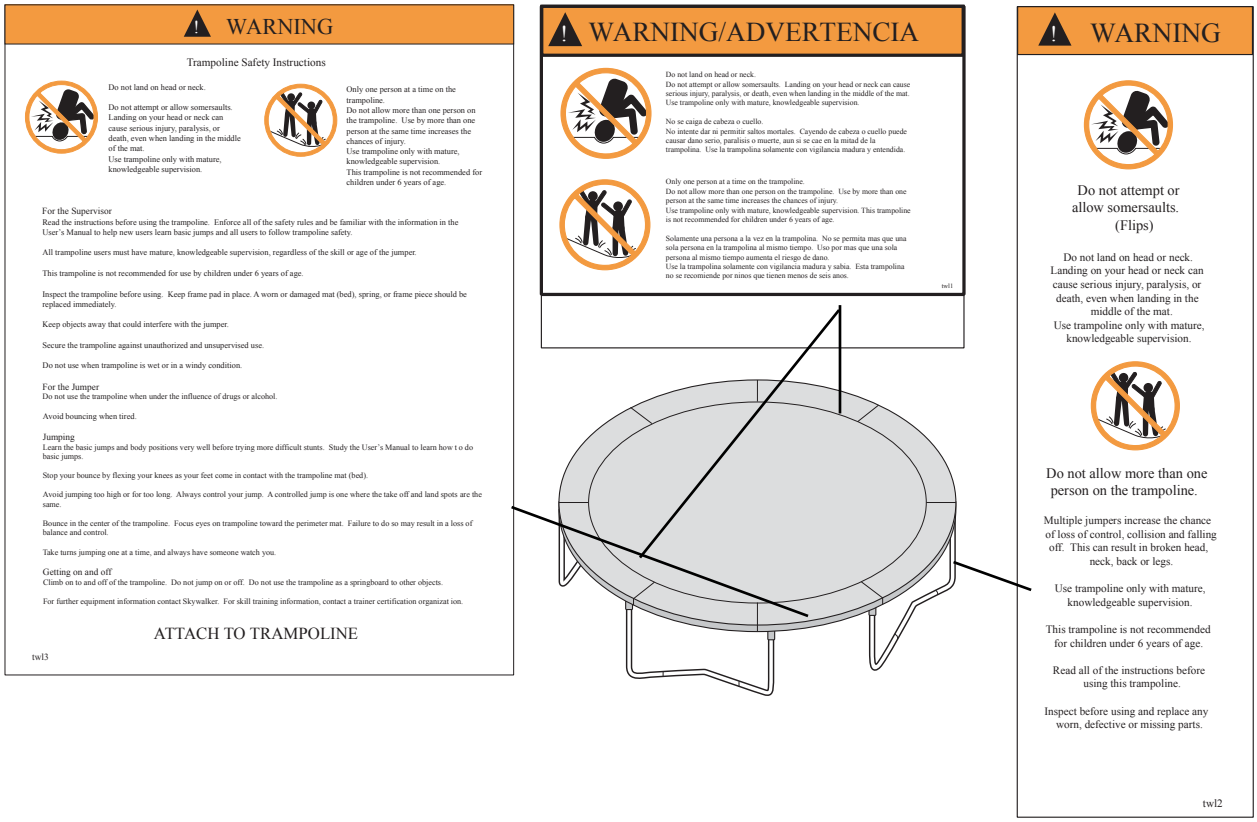
23. While keeping head erect, focus eyes on the trampoline toward The perimeter. This will help control bounce.

24. Avoid bouncing when tired. Keep turns short.

25. Stop bouncing by flexing knees as feet come in contact with the trampoline bed. Learn this skill before attempting others.

26. Learn Fundamental bounces and body positions thoroughly before before trying more advanced skills. A variety of trampoline activities can be carried out performing the basic fundamentals in various series and combinations, performing one fundamental after another, with or feet bounces between them.

WARNING LABEL PLACEMENT



WARNING
Trampoline Safety Instructions
Do not land on head or neck.
Do not attempt or allow somersaults. Landing on your head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the mat.
Use trampoline only with mature, knowledgeable supervision.
Only one person at a time on the trampoline.
Do not allow more than one person on the trampoline. Use by more than one person at the same time increases the chances of injury.
Use trampoline only with mature, knowledgeable supervision.
This trampoline is not recommended for children under 6 years of age.
For the Supervisor
Read the instructions before using the trampoline. Enforce all of the safety rules and be familiar with the information in the User's Manual to help new users learn basic jumps and all users to follow trampoline safety.
All trampoline users must have mature, knowledgeable supervision, regardless of the skill or age of the jumper.
This trampoline is not recommended for use by children under 6 years of age.
Inspect the trampoline before using. Keep frame pad in place. A worn or damaged mat (bed), spring, or frame piece should be replaced immediately.
Keep objects away that could interfere with the jumper.
Secure the trampoline against unauthorized and unsupervised use.
Do not use when trampoline is wet or in a windy condition.
For the Jumper
Do not use the trampoline when under the influence of drugs or alcohol.
Avoid bouncing when tired.
Jumping
Learn the basic jumps and body positions very well before trying more difficult stunts. Study the User's Manual to learn how t o do basic jumps.
Stop your bounce by flexing your knees as your feet come in contact with the trampoline mat (bed).
Avoid jumping too high or for too long. Always control your jump. A controlled jump is one where the take off and land spots are the same.
Bounce in the center of the trampoline. Focus eyes on trampoline toward the perimeter mat. Failure to do so may result in a loss of balance and control.
Take turns jumping one at a time, and always have someone watch you.
Getting on and off
Climb on to and off of the trampoline. Do not jump on or off. Do not use the trampoline as a springboard to other objects.
For further equipment information contact Skywalker. For skill training information, contact a trainer certification organizat ion.
ATTACH TO TRAMPOLINE
twl3
WARNING/ADVERTENCIA
Do not land on head or neck.
Do not attempt or allow somersaults. Landing on your head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the mat.
Use trampoline only with mature, knowledgeable supervision.
No se caiga de cabeza o cuello.
No intente dar ni permitir saltos mortales. Cayendo de cabeza o cuello puede causar dano serio, paralisis o muerte, aun si se cae en la mitad de la trampolina. Use la trampolina solamente con vigilancia madura y entendida.
Only one person at a time on the trampoline.
Do not allow more than one person on the trampoline. Use by more than one person at the same time increases the chances of injury.
Use trampoline only with mature, knowledgeable supervision. This trampoline is not recommended for children under 6 years of age.
Solamente una persona a la vez en la trampolina. No se permita mas que una sola persona en la trampolina al mismo tiempo. Uso por mas que una sola persona al mismo tiempo aumenta el riesgo de dano.
Use la trampolina solamente con vigilancia madura y sabia. Esta trampolina no se recomiende por ninos que tienen menos de seis anos.
twl1
WARNING
Do not attempt or allow somersaults. (Flips)
Do not land on head or neck. Landing on your head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the mat.
Use trampoline only with mature, knowledgeable supervision.
Do not allow more than one person on the trampoline.
Multiple jumpers increase the chance of loss of control, collision and falling off. This can result in broken head, neck, back or legs.
Use trampoline only with mature, knowledgeable supervision.
This trampoline is not recommended for children under 6 years of age.
Read all of the instructions before using this trampoline.
Inspect before using and replace any worn, defective or missing parts.
twl2

The labels shown on this page have been attached to the trampoline in the indicated locations. The placard will be attached by the owner (see step 10 on page 14). If one of the labels or the placard is missing or illegible, call our Customer Care Hot Line toll-free at 1-866-603-Jump (5867), Monday through Friday, 8 a.m. until 5 p.m. Mountain Time, to order a free replacement label or placard. Attach the label or placard in the location shown.

Note: The labels and placard are not shown actual size.

Specific use Limitations HIGH WIND

It is possible for the trampoline and enclosure to be blown about by high winds. If you expect high winds, move the trampoline and enclosure to a sheltered location. Disassemble (take down) the enclosure netting. Tie the trampoline frame down to the ground using ropes and stakes (not included).

BEFORE YOU BEGIN

Thank you for choosing you SKYWALKER TRAMPOLINES Brand Trampoline. The SKYWALKER TRAMPOLINES Round Trampolines are designed and crafted to provide many years of fun and fitness. This trampolines comes equipped with warnings and instructions for the assembly, care, maintenance, and use of the trampoline. This information must be read by all trampoline supervisors and users before any person is allowed to jump on the trampoline.

If you have questions after reading this manual, please call our toll-free Customer Care Hot Line at 1-866-603-Jump (5867), Monday through Friday, 8 a.m. until 5 p.m. Mountain Time (excluding holidays). To help us assist you, please mention the model and name of the trampoline when calling. (See the inside cover of this manual.)

⚠ TRAMPOLINE SAFETY INFORMATION

In trampoline use, as in all active recreational sports, participants can be injured. However, there are steps that can be taken to reduce the risk of injury. In this section, primary accident patterns are identified and the responsibilities of supervisors and jumpers in accident prevention are described.

ACCIDENT CLASSIFICATION

Somersaults (flips): Landing on your head or neck, even in the middle of the trampoline mat, increases the risk of a broken back or neck, which can result in paralysis or death. Such events can occur when a jumper makes an error trying to perform a forward or backward somersault (flip). Do not perform somersaults (flips) on this backyard trampoline.

Multiple Jumpers: More than one jumper at a time on the trampoline increases the chance of a jumper becoming injured by losing control of his or her jump. Jumpers may collide with one another, fall off of the trampoline, fall onto or through the springs, or land incorrectly on the mat. The jumper weighing the least is the jumper most likely to be injured.

Mounting and Dismounting (Getting On and Off): The trampoline mat is several feet above ground level. Jumping from the trampoline to the ground or any other surface may result in injury. Jumping onto the trampoline from a roof, deck, or other objects also presents a risk of injury. Smaller children may need assistance getting onto or down from the trampoline. Climb carefully onto and off of the trampoline. Do not step onto the springs or the frame pad. Do not grasp the frame pad to pull yourself onto the trampoline.

Striking the Frame or the Springs: Injury may result from hitting the frame or falling through the springs while jumping or getting onto or off of the trampoline. Stay in the center of the mat when jumping. Be sure to keep the frame pad in place to cover the frame. The frame pad is not made or intended to support the weight of the trampoline user. Do not step or jump directly onto the frame pad.

Loss of Control: Jumpers who lose control of their jumps may land on the mat incorrectly, land on the frame or springs, or fall off of the trampoline. A controlled jump is one where the landing is in the same spot as the takeoff. Before learning a more difficult stunt, you should be able to do one before over and over with control . Attempting a stunt beyond present skill levels increases the chance of loss of control. To regain control and stop your jump, bend your knees sharply when you land.

Alcohol or Drug Use: The chance of injury increases when a jumper has consumed alcohol or taken drugs. These substances impair a person’s reaction time, judgment, and physical coordination.

Encountering Objects: Jumping on a trampoline while other people, pets, or objects are underneath it will increase the chance of getting hurt. Jumping while holding or having an object on the trampoline, particularly one that is sharp or breakable, will increase the chance of injury. Placing a trampoline too close to overhead electrical wires, tree limbs, or other objects can increase the chance of injury.

Poor Maintenance of the Trampoline: Jumpers may be injured if a trampoline is used when it is in poor condition. A torn mat, bent frame, broken spring, or missing frame pad, for example, should be replaced before anyone is allowed to jump. Inspect the trampoline before each use.

Weather Conditions: A wet trampoline mat is too slippery for safe jumping. Gusty or high winds can cause jumpers to lose control. To reduce the chance of injury, use the trampoline only when the weather is good.

Access: To prevent access to the trampoline by unsupervised smaller children, the optional access ladder should always be taken away and stored in a safe place when the trampoline is not in use.

⚠ METHODS OF ACCIDENT PREVENTION

The Supervisor's Role in Preventing Accidents

It is the responsibility of the supervisors of trampoline users to provide knowledgeable and mature supervision. They need to know and enforce all of the rules and warnings printed in this manual to minimize the likelihood of accidents and injuries. They also need to inform users of these rules. During periods of time when supervision is unavailable or inadequate, this may require that the trampoline is taken down, placed in a secure area, or otherwise secured against unauthorized use. Another option that may be considered is covering the trampoline with a heavy tarp that can be secured with locks and chains. It is the responsibility of the supervisor to make sure that the placard with TRAMPOLINE SAFETY INSTRUCTIONS (see step 8 on page 14) is kept posted on the trampoline and that jumpers are informed about these instructions.

The Jumper's Role in Preventing Accidents

Education on the part of the user is a must for safety. Users must first learn a low, controlled bounce and then learn the basic landing positions and combinations before proceeding to intermediate skills. Jumpers must understand why they have to master "control" before they can start thinking about other moves. Understanding the proper progression of skills in jumping on a trampoline must be the first lesson. Review this manual to learn about the basic techniques for using the trampoline. Follow the rules on the placard with TRAMPOLINE SAFETY INSTRUCTIONS (see step 8 on page 14). For further information or additional instructional materials, contact a certified trampoline instructor.

TRAMPOLINE SAFETY INSTRUCTIONS

For the Supervisor

Read the instructions before using the trampoline. Enforce all of the safety rules. Become familiar with the information in this manual so you can help new users learn basic jumps and all users follow trampoline safety. All trampoline users must have mature, knowledgeable supervision, regardless of their skill or age.

This trampoline is not recommended for use by children under 6 years of age.

Inspect the trampoline before using it. Do not use the trampoline without the frame pad securely in place to cover the frame. Do not use the trampoline when it is wet or in a windy condition. A worn or damaged mat, spring, or frame piece should be replaced immediately.

Keep objects away that could interfere with the jumper.

Secure the trampoline against unauthorized and unsupervised use.

For the Jumper

Do not use the trampoline when you have been using drugs or alcohol.

JUMPING

Learn fundamental jumps and body positions thoroughly before trying more advanced skills. Know your own limits in performing each of the trampoline jumps. Study this manual to learn how to do basic jumps.

Stop your bounce by flexing your knees as your feet come in contact with the trampoline mat. Learn this skill before attempting any others.

Avoid jumping too high or for too long. Always control your jump. A controlled jump is one where the landing is in the same spot as the takeoff.

Bounce in the center of the trampoline. Focus eyes on trampoline toward the perimeter. In you don't do this you may lose your balance and control.

Take turns jumping, one at a time, and always have someone watch you.

GETTING ON AND OFF

Climb onto and off of the trampoline. Do not jump onto or off of it. Do not use the trampoline as a springboard to jump to other objects or places.

For additional information regarding equipment, contact Skywalker Holding, LLC. For additional information regarding skill training, contact a trainer certification organization.

USE AND INSTRUCTIONAL MATERIAL

OVERVIEW OF TRAMPOLINE USE

The first periods of trampoline use should focus on learning fundamental body positions and practicing the eight basic bounces that are described on pages 9 and 10.

During this learning period, jumpers should practice these basic techniques and perfect them. Braking, or checking the bounce, should be taught first and stressed as a safety measure. Jumpers should brake their jump whenever they start to lose their balance or control. This is done by simply flexing the knees sharply upon landing and absorbing the upward thrust of the mat. This allows the jumper to stop suddenly and avoid losing control.

With trampoline use, the takeoff point and landing point of a good, controlled jump are in the same spot. An exercise is considered learned only when a jumper is able to perform it correctly time after time. Jumpers should never go on to any advanced stunt until they can perform all previous stunts correctly each time.

Allow each jumper a brief turn on the trampoline. Extended bouncing exposes an overtired user to an increased risk of injury. Longer turns tend to lessen the interest of others waiting to jump. Clothing should consist of a T-shirt and shorts. Jumpers should wear regulation gymnastic shoes or heavy socks, or they may jump barefoot. Street shoes or tennis shoes should not be worn on the trampoline. Beginning jumpers may wish to wear loose-fitting protective clothes, such as a long-sleeve shirt and pants, until correct landings are mastered. This will reduce the chance of mat (bed) burns from improper landings on elbows and knees. No hard-sole shoes should be worn, as they cause extra wear on the trampoline mat.

Mounting and dismounting (getting on and off) properly should be a strict rule from the beginning. Users should climb onto the trampoline by placing their hands on the frame and stepping or rolling up onto the frame, across the springs, and onto the mat. They should not step directly on the frame pad or hold on to the frame pad when getting onto or off of the trampoline. Users should always place their hands on the frame while getting on or off. To get off, jumpers should walk to the side of the mat, bend over and place one hand on the frame, and then step from the mat to the ground. If you have installed the optional ladder, its rungs can be used to get on or off. Always face the ladder and place your hands on the frame. Make sure your foot has secure contact with the ladder rung when using it.

Reckless bouncing should not be permitted. All skills should be learned at moderate heights. Control, rather than height, should be emphasized. Jumpers should be forbidden to practice alone and unsupervised.

INSTRUCTIONAL PROGRAM AND MODEL LESSONS

The following lessons are examples of an instructional program. They should follow a complete discussion and demonstration of body mechanics between the supervisor and the student(s). See pages 9 and 10 for descriptions of basic trampoline skills.

Lesson 1
1. Mounting and dismounting (getting on and off)—Demonstration and practice of proper techniques.
2. Fundamental bounce—Demonstration and practice.
3. Braking (stopping the bounce)—Demonstration and practice. Braking on command.
4. Hand and knee drop—Demonstration and practice, stressing four-point landing and alignment.

Lesson 2
1. Review and practice of skills already learned.
2. Knee drop—Half twist to the right, to the left, to the feet, and then to the knees.
3. Seat drop—Half twist to the feet. Seat drop, knee drop, hand and knee drop, repeat.

Lesson 3
1. Review and practice of skills already learned.
2. Front drop—To save time and avoid mat (bed) burns, all students should be requested to assume the front drop position on the floor while the instructor checks for faults. Suggested progression: from hand and knee bounce, the body is extended for the landing in the front drop position, and the rebound is made to the feet.
3. Practice routine—Hand and knee drop, front drop, feet, seat drop, half twist to feet.

Lesson 4
1. Review and practice of skills already learned.
2. Back drop—Demonstration, emphasizing the forward thrust of the hips by arching the body as one leg is brought forward from the standing (not bouncing) position, and the drop to the back with the chin held forward to the chest and the eyes forward on the frame pad. Spotting this skill is most important. Demonstration of back drop with low bounce and practice of both techniques.

Lesson 5
1. Review and practice of skills already learned, encouraging original routines based on them.
2. Half turntable—Start from the front drop position and push to the left or right with the hands. Turn the head and shoulders in the same direction. Keep the back parallel to the mat and the head up. After completing a half turn, land in the front drop position.

Lesson 6
1. Swivel hips—Suggested progression: seat drop, feet, half twist, repeat; seat drop, half twist to feet, repeat; seat drop, half twist to seat drop.
2. Half turntable.

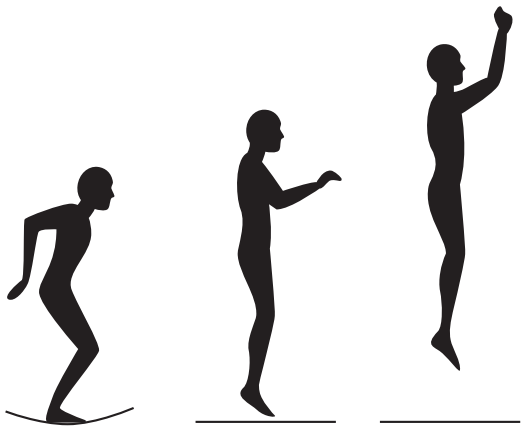
Lesson 7

The student should now be encouraged to design and organize routines, with emphasis on good form. The instructor may judge or grade students and arrange groupings for further instruction accordingly. To stimulate interest in competition, the game of "Trampoline Horse" can be introduced. Before the game begins, students must count off. To start the game, student number 1 performs a stunt. Student number 2 then mounts the trampoline, performs the same stunt and adds a second stunt. Student number 3 mounts and performs stunts 1 and 2 and adds a third stunt. Thus the series of stunts is continuously lengthened. The first person to miss a stunt in the series assumes the letter "H" and starts a new series with a stunt. If a person misses again, he assumes the letter "O." When a person accumulates "H-O-R-S-E," he or she is eliminated from the game. The last remaining contestant is the winner. Lesson planning from this point on should be facilitated by contacting a certified trampoline instructor.

BASIC TRAMPOLINE SKILLS

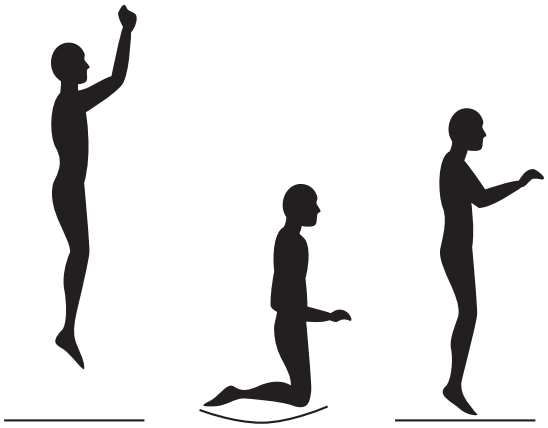
Fundamental Bounce

1. Start from a standing position with your head erect and your eyes on the frame pad.
2. Swing your arms forward and up in a circular motion.
3. Bring your feet together and point your toes downward while in the air.
4. Keep your feet about 15 inches apart when landing on the mat.



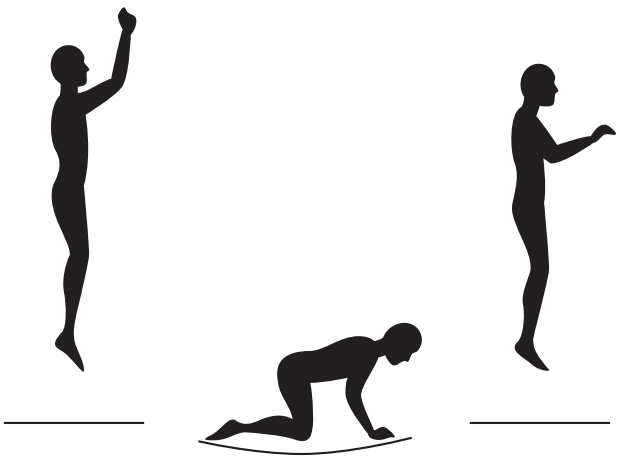
Knee Drop

1. Start bouncing from a standing position, keeping your eyes on the frame pad.
2. Land on your knees, keeping your back straight and your body erect.
3. Come back up to an erect position.



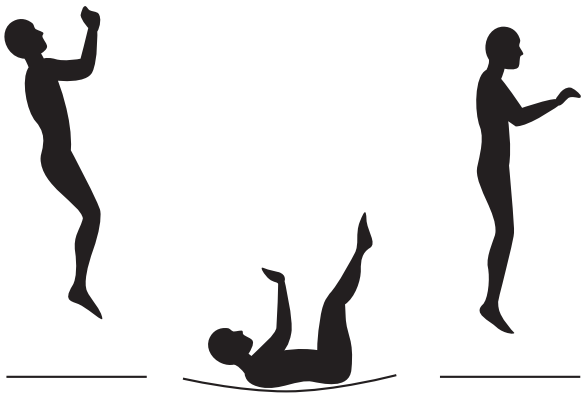
Hand and Knee Drop

1. Start bouncing from a standing position, keeping your eyes on the frame pad.
2. Land on the mat on your hands and knees.
3. Push with your hands and come back up to an erect position.



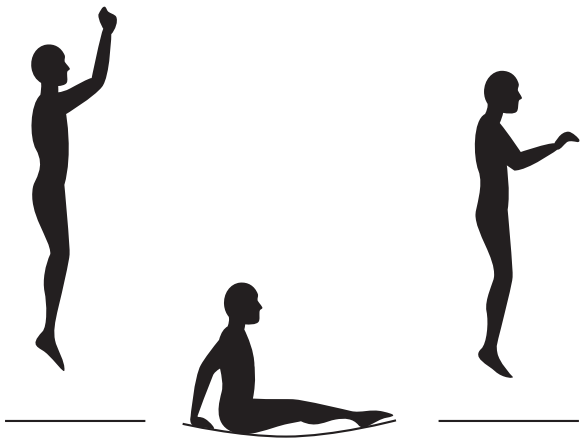
Back Drop

1. Start from a low bounce and land on your back.
2. Keep your chin forward on your chest as you land.
3. Kick forward and up with your legs to return to an erect position.



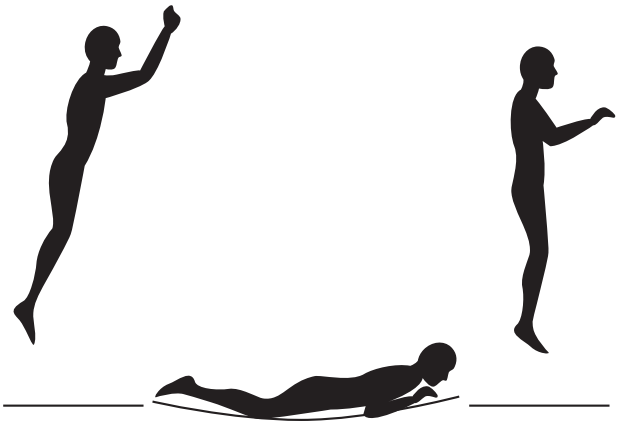
Seat Drop

1. Land in a sitting position with your legs parallel to the mat.
2. Place your hands on the mat beside your hips.
3. Push with your hands to return to an erect position.



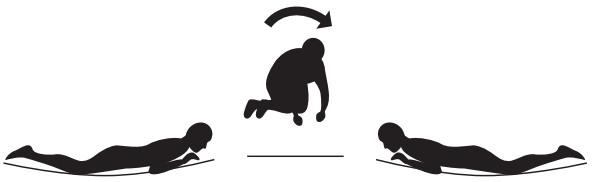
Front Drop

1. Start from a low bounce and land on the mat in a prone position.
2. Keep your head up and your arms extended forward on the mat.
3. Push with your arms to return to an erect position.



Half Turntable

1. Start from the front drop position and push to the left or right with your arms to begin turning your body in the opposite direction.
2. Turn your head and shoulders toward the direction that your body is turning.
3. Keep your back parallel to the mat and your head up.
4. After completing a half turn, land in the front drop position.



Swivel Hips

1. Start with a seat drop.
2. Turn your head to the left or right and swing your arms up in the same direction.
3. Turn your hips in the same direction as your head and arms, completing a twist.
4. Land in the seat drop position.

ASSEMBLY

IMPORTANT ASSEMBLY INFORMATION

- Need phillips screw driver and 2 adjustable wrenches (putting the trampoline together). A rubber mallet may make assembly easier, however.
- Assembly requires two persons.
- Wear gloves to protect your hands from pinch points during assembly.

TRAMPOLINE PLACEMENT

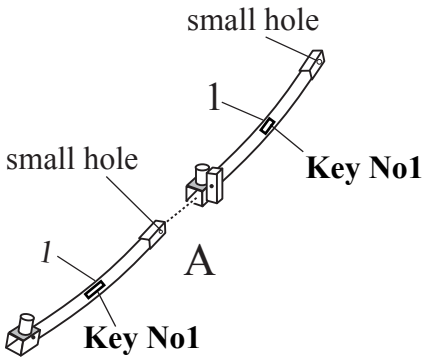
1. Place the trampoline on a level surface before using it.
2. Adequate overhead clearance is essential. A minimum of 24 feet from ground level is best. Provide clearance for wires, tree limbs, and other possible hazards. Lateral (sideways) clearance is also essential. Place the trampoline away from walls, structures, fences, and other play areas. Always have a clear space on all sides of the trampoline.
3. Use the trampoline in a well-lighted area. Electric lights may be required for shady areas.
4. Secure the trampoline against unauthorized and unsupervised use.
5. Remove any objects from beneath the trampoline.
6. The owner and supervisors of the trampoline are responsible to make all users aware of practices specified in this manual.

1. Make sure that you understand the information in the box at the top of this page.

Lay one Top Tube(1) with socket and one top tube (1) with T -joint On the ground in the position as shown. Make sure the Top Tube is turned so the small holes (spring holes) are facing the ground.

Insert one end of the Top Tube into the socket of Top Tube(1). The Top Tubes should now appear as shown in step 3 in next page.

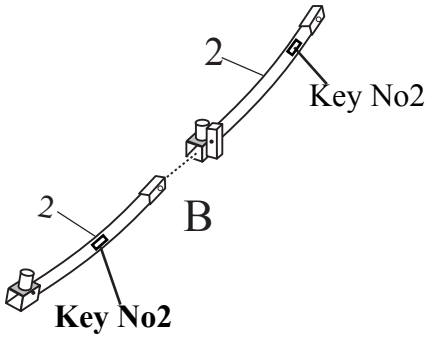
Repeat above assembly steps until two assembly units (A) will be completed.



2. Lay one Top Tube (2) with socke and one top tube (2) with T-joint On the ground in the position as shown. Make sure the Top Tube is turned so the small holes (spring holes) are facing the ground.

Insert one end of the Top Tube(2) into the socket of Top Tube(2) The Top Tubes should now appear as shown in step 4 in next page.

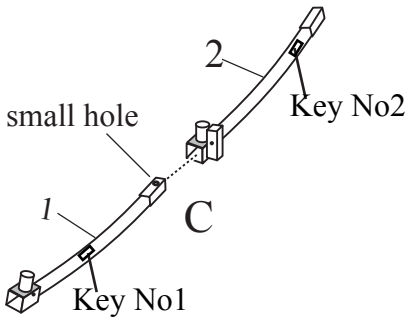
Repeat above assembly steps until two assembly units(B) will be completed.



3. Lay one Top Tube (1) with T- joint and one top tube (2) with socket On the ground in the position as shown. Make sure the Top Tube is turned so the small holes (spring holes) are facing the ground.

Insert one end of the Top Tube(1) into the socket of Top Tube(2) The Top Tubes should now appear as shown in step 4 in next page.

Repeat above assembly steps until two assembly units(C) will be completed.

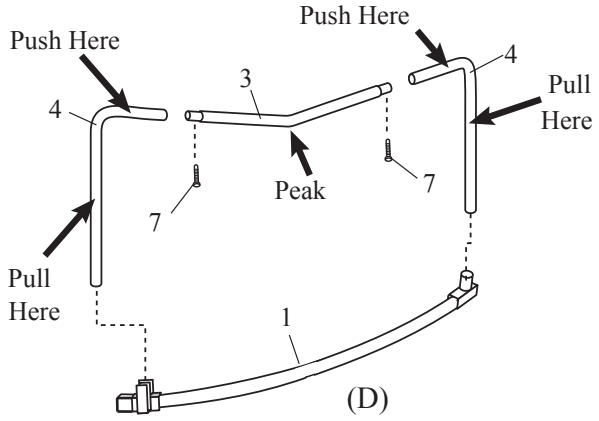


4. Slide two Legs (4) into a Brace (3) as shown. The peak of the Brace (3) should point toward the ground. Screw the two Screws (7) into the two Legs (4) and Brace (3).

Insert one of the Legs (4) halfway into one of the T-joint assembled in step 1. Insert the other Leg halfway into the Socket Press down on both Legs at the same time and fully insert them into the Sockets and T-joint

Note: You may need to pull outward on the Legs as you insert them into the Sockets and T-joint

Repeat above steps until the six assembled leg sections (E) have been completed as shown in next step.

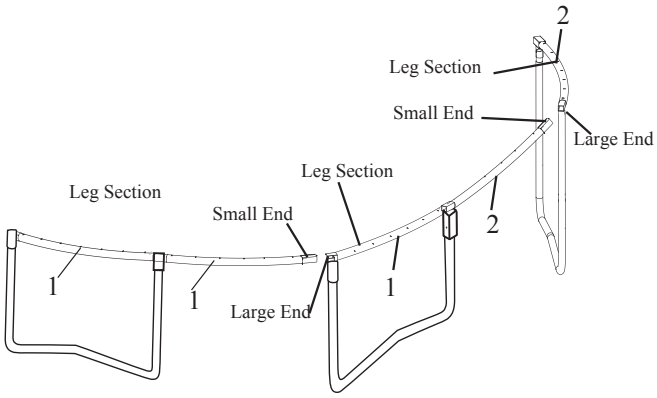


(D)

5. Note: This step requires two persons. During this step, you will connect the six assembled leg sections together.

Stand three leg sections(E) and hold them in the positions shown. Slide the large end of the leg section(E) into the small end of the indicated Top Tube on one of the leg sections.

Repeat this step until all six leg sections are connected. When this step is completed, the frame will be fully assembled and freestanding.



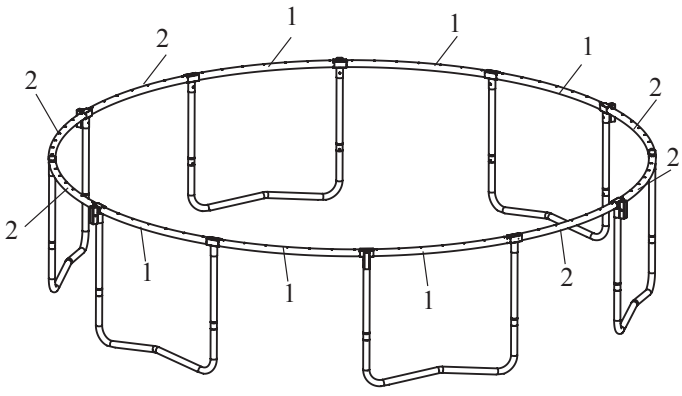
(E)

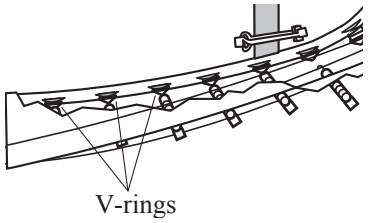
6. Lay the Bed (Mat) (5) on the ground inside the assembled frame. Make sure that the two warning decals (not shown) are on top of the Bed (Mat). (Not Shown.)

Note: If you purchased the Skywalker Trampoline Combo, the enclosure was pre-installed on the Bed (Mat) (5) at the factory. Inspect the attachments of the enclosure Netting to the trampoline mat (bed). Make certain each of the V-rings on the trampoline mat (bed) is threaded through the corresponding “buttonhole” in the Netting. Be sure to place the opening in the Netting so it is centered under the arch where the jumpers will climb off of and onto the trampoline. If you did not purchase a Trampoline enclosure, disregard this paragraph.

Note: There are 96 V-rings around the edge of the Bed (Mat) (5) and 96 holes around the top of the frame. In Steps 4 and 5 you will attach the Bed (Mat) (5) to the frame, using 96 Springs (8).

Caution: It is wise to wear leather gloves while attaching the Springs. Be careful where you place your hands as the Springs and frame joints can pinch.





Attach the Springs (8) as follows: Hook one end of a Spring (8) into a V-ring. (See the inset drawing.) Hook a second Spring (8) (not shown) to the free end of the first Spring (8). Use the second Spring to pull the first Spring until it reaches the frame. Push the end of the first Spring into a hole in the frame. Unhook the second Spring.

After you have hooked one Spring (8) into one of the V-rings on the Bed (Mat) (5), count exactly 24 V-rings and 24 frame holes in a clockwise direction. Attach a second Spring to the V-ring and frame at this point. Count 24 V-rings and 24 frame holes in a clockwise direction and attach a third Spring. Count 24 V-rings and 24 frame holes in a clockwise direction and attach a fourth Spring.

7. After attaching the first four Springs (8), count exactly 12 V-rings and 12 frame holes in a clockwise direction. Attach another Spring to the V-ring and frame at this point. Count 24 V-rings and 24 frame holes in a clockwise direction and attach another Spring. Count 24 V-rings and 24 frame holes in a clockwise direction and attach another Spring. You will now have 8 evenly spaced Springs (8) attaching the Bed (Mat) (5) to the trampoline frame.

Attach eight Springs (not shown) evenly between the eight attached Springs in the same manner as before.

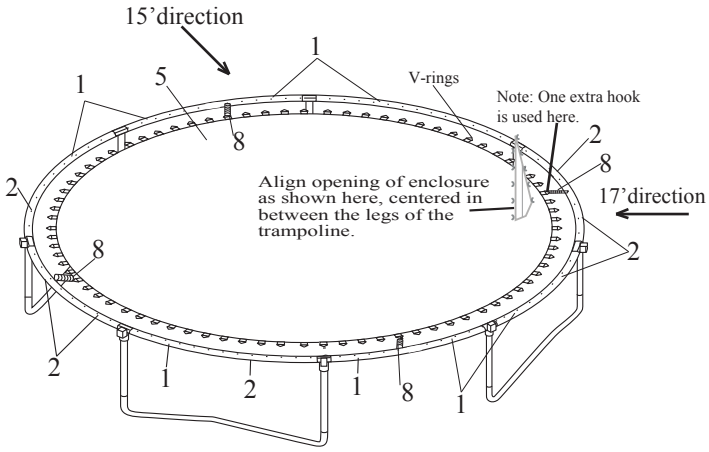
Attach sixteen Springs (not shown) evenly between the sixteen attached Springs.

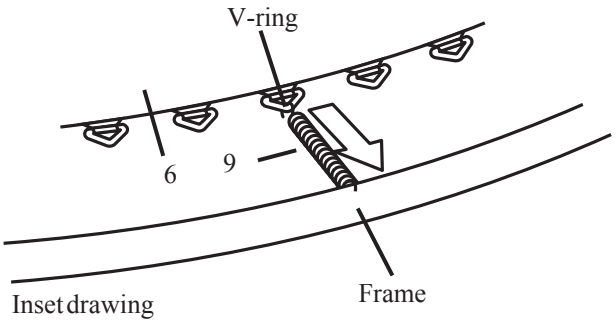
Continue to attach the remaining Springs between the previously attached Springs, until all Springs are attached.

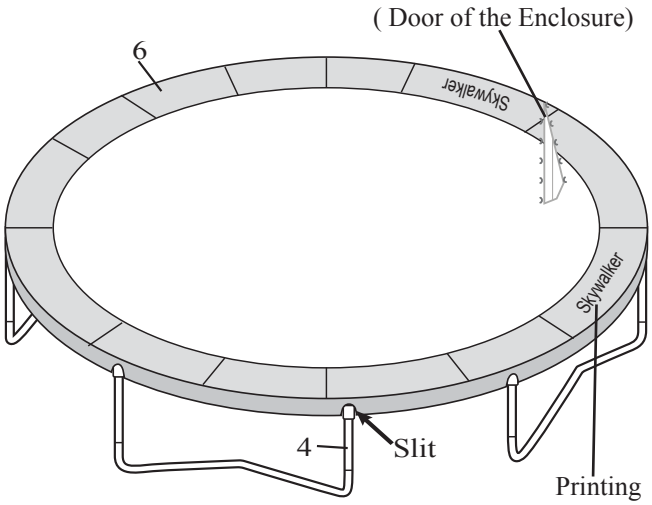
Safety Note: For the Bed (Mat) (5) to have the even tension necessary for safety in jumping, the Springs (8) must be attached as described. As you attach Springs, carefully count the V-rings and frame holes. If a V-ring or hole is skipped, reattach the Springs in the proper position.

8. Lay the frame Pad (6) on the frame. Adjust the position of the Frame Pad so that the slits are directly above the Legs (4), as shown. Make sure the printing of the " Skywalker" is located as shown.

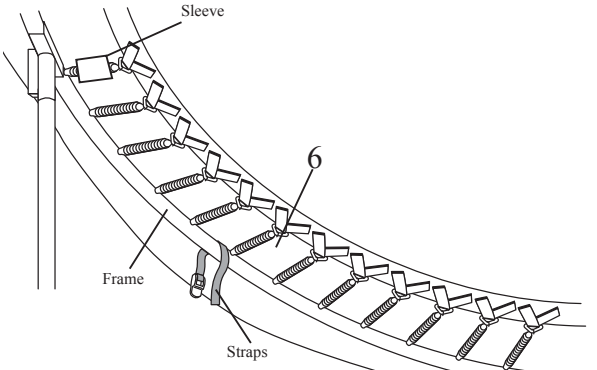
(If you are using the Skywalker Trampoline Enclosure, go to the Skywalker Trampoline Enclosure User's Manual, pages 8-11, for instructions in assembling the Enclosure. The Enclosure must be assembled and secured to the trampoline frame before proceeding further with trampoline assembly.)







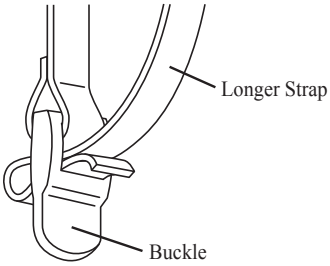
Do not use the trampoline without the Frame Pad (6). The Frame Pad is designed to reduce the possibility of injuries due to jumpers coming in contact with the trampoline frame. If you do not have a Frame Pad, contact your dealer to obtain one. Properly install the Frame Pad before using the trampoline.



9. Look under the trampoline and locate the straps and sleeves attached to the underside of the Frame Pad. Position each outer strap so that one strap is on each side of the frame as shown. Position each sleeve above spring and disconect spring and slide spring through sleeve and reattach to mat as shown.

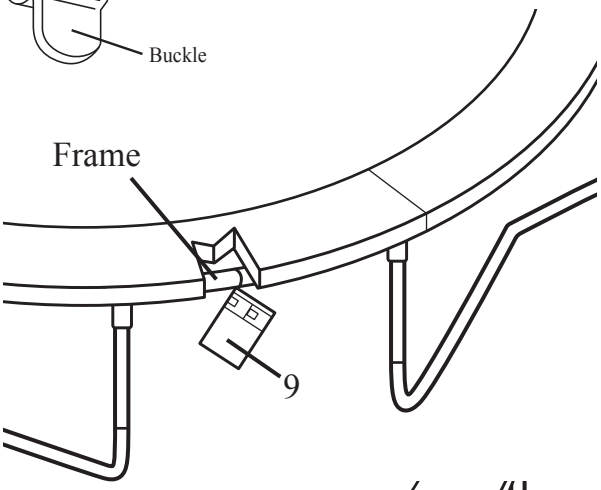
Repeat this with the remaining sleeves (not shown).

Refer to the inset drawing. Hold one of the straps. Wrap the longer strap under the frame and then thread the strap through the buckle on the shorter strap as shown. Pull the end of the longer strap to tighten straps. Do not overtighten the straps. Leave 1/4 inch gap.

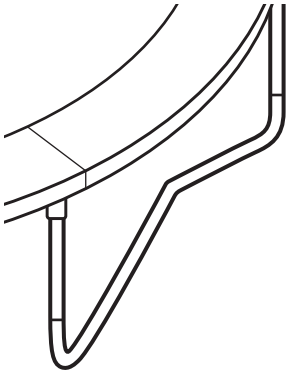


Repeat this step with the remaining straps (not shown).

10. Using the included plastic tie, attach the Safety Placard (9) to the frame near the point where jumpers will climb onto and off the trampoline.



The trampoline is now fully assembled. Make sure that all parts are securely attached. Familiarize yourself and all users of the trampoline with the safety precautions, use and instructional materials, and care and maintenance instructions in this manual before using the trampoline.



DISASSEMBLY (TAKING APART)

To disassemble (take apart) the trampoline, follow assembly steps 1 through 10 in reverse order. Do not attempt to disassemble any frame parts before the springs and the mat have been removed. Use gloves to protect your hands from pinch points while taking the trampoline apart.

CARE AND MAINTENANCE

CARE

Do not allow pets on the trampoline, as their claws may snag and pull the mat material or damage the frame pad.

The trampoline is intended to be used by one person at a time who weighs not more than 200 pounds. The user should be either barefoot, wearing socks, or wearing gymnastic shoes. Street shoes or tennis shoes should not be worn on the trampoline. The user should remove all sharp objects from his or her person that may cause injury or damage to the mat. Heavy, sharp, or pointed hard objects should never touch the mat.

MAINTENANCE

Your trampoline was manufactured using quality materials and crafted to provide you and your family with many years of enjoyment and exercise. Proper maintenance and care will help to prolong the life of the trampoline and reduce the possibility of injury. The following guidelines should always be followed.

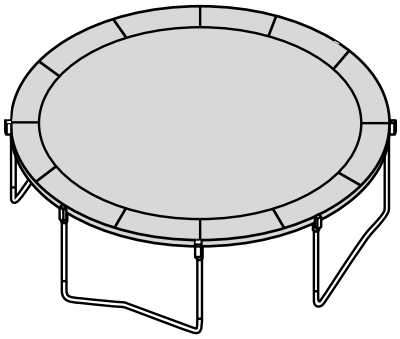
Inspect the trampoline before each use, and replace any worn, defective, or missing parts. The following conditions could represent possible hazards and increase the danger of personal injury:

- a missing, improperly positioned, or insecurely attached frame padding
- punctures, frays, tears, or holes worn in the mat or frame padding
- deterioration (wearing out) in the stitching or fabric of the mat or frame padding
- ruptured or missing springs
- a bent or broken frame or leg
- a sagging bed
- sharp protrusions on the frame or suspension system

If any of these conditions exist, the trampoline should be taken apart or otherwise protected against use until the condition is fixed.

SPECIAL CONSIDERATIONS

High Wind



The trampoline can be blown around by high winds. If you expect high winds, the trampoline should be moved to a sheltered location, taken apart, or tied down to the ground with ropes and stakes (not included). At least three ropes and three stakes should be used. Make sure to attach the ropes to the top of the frame; do not simply secure the legs or the bases to the ground, as they can separate from the frame sockets. The tops of the stakes should be at ground level so they will not create a tripping hazard. In addition, the tops of the stakes should be covered, if necessary, so that users will not be injured by falling onto the stakes.

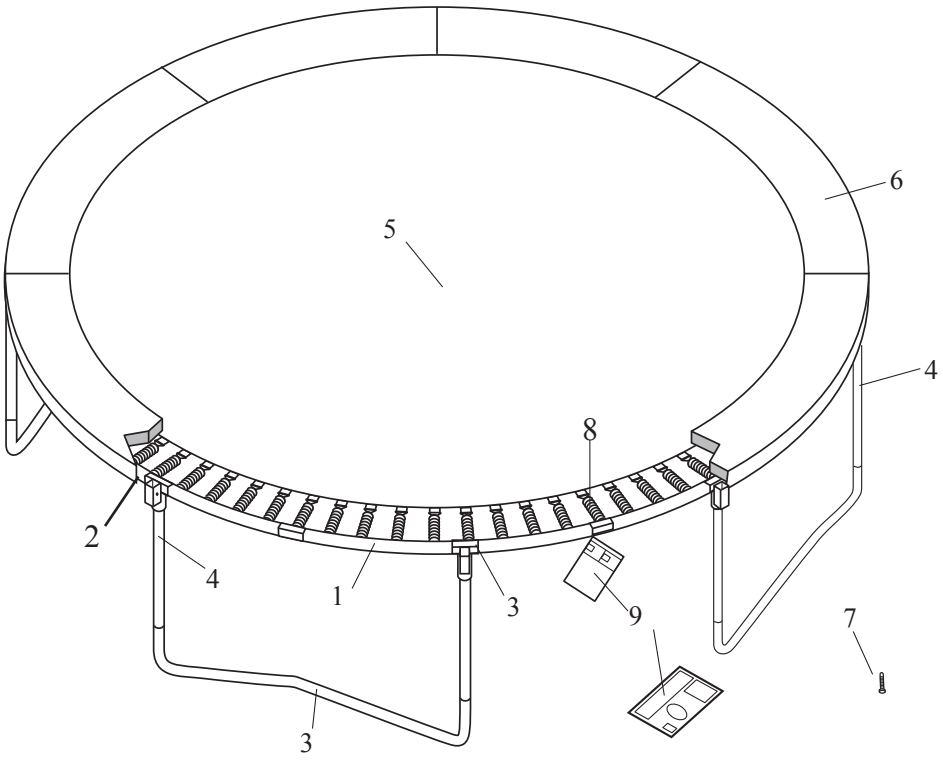
Moving the Trampoline

If the trampoline needs to be moved, it should be moved by two persons, kept horizontal, and lifted slightly. If necessary, the trampoline can be taken apart for moving. To take the trampoline apart, follow the assembly steps in reverse order (see pages 11 to 14). Do not attempt to take the frame sections, legs, or bases apart before the mat and springs have been removed.

EXPLODED DRAWING AND PARTS LIST

Key No.	Qty.	Description
1	6	Top Tube(with small hole)
2	6	Top Tube (with small arc)
3	6	Brace
4	12	Leg
5	1	Stitched Bed with 96 V-rings
6	1	Frame Pad
7	12	#8 Sheet Metal Screw 3/4”
8	96	Springs
9	1	User’s Manual and Safety Placard
*	1	Set of ASTM Frame Labels

* These parts are not illustrated.
Specifications are subject to change without notice.



ORDERING REPLACEMENT PARTS

To order replacement parts, visit our web site at www.skywalkertrampolines.com or call our toll-free Customer Care Hot Line at 1-866-603-Jump (5867), Monday through Friday, 8 a.m. until 5 p.m. Mountain Time (excluding holidays). To help us assist you, please provide the following information when calling:

- the MODEL of the trampoline (see the front cover of this manual)
- the KEY NUMBER and DESCRIPTION of the part (see the PART LIST above)
- the quantity needed
- the desired method of shipping

LIMITED WARRANTY

Skywalker Holdings, LLC warranties its trampoline products to be free from defects in material and workmanship under normal use and service conditions. The steel frame is warranted for one (1) year after the date of purchase. All other parts are warranted for ninety (90) days after the date of purchase.
